

# LIBRARY USED

Here are the main Python libraries used to build this project:

1. **Django** (django)
  - The main web framework used to handle the backend, database, and views.
2. **xhtml2pdf** (xhtml2pdf)
  - Used to convert our HTML templates into downloadable PDF reports.
3. **Matplotlib** (matplotlib)
  - Used to generate the "Income vs Expense" bar chart for the report.
4. **Pillow** (pillow)
  - A helper library required for handling images (like the chart and logo).

## Requirements File

All dependencies are listed in requirements.txt. You can install them using:

```
pip install django xhtml2pdf matplotlib pillow
```
